CO₂ emissions

ENVIRONMENTAL INFORMATION 02987_UA_EN - 19.07.2018 - www.vs-furniture.com

SitAndStand Height adjustable sit-at/stand-at table.

As an example of the SitAndStand product family model no. 02987 has been analyzed:

Frame of powder-coated steel tube with a table top of melamine-resin-coated LIGNOpal chipboard.

Product composition and recycling content: The first two columns of Table 1 and the pie chart set out the materials used with the corresponding proportions by weight in per cent. The proportion of recycling material is indicated according to the type of material.

The materials of the product family are 100% recyclable:

- Recovery of old material after use
- Recyclability: possibility of recovery

CO₂ emissions: Assessment of the products in terms of CO₂ emissions is performed for the materials used (including extraction of raw materials and upstream processes) and with regard to the processes implemented at VS and transport volume.

Life cycle and product responsibility: Details on materials, processes, packaging, transport, use and disposal can be found on the pages "Choice of materials at VS" and "Processes at VS". Clarifications on the certificates can be found at "Sustainability and safety at VS".
